PRELIMINARY AMENDMENT

Please amend the present application as follows:

IN THE SPECIFICATION:

Please amend the specification by inserting before the first line:

5 --The present application is a divisional application of US Patent Application No.
08/756,776, filed 26 November 1996, now US Patent No. _____, the teachings of
which are incorporated herein by reference; which is a divisional application of US
Patent Application No. 08/284,766, filed 2 August 1994, now US Patent No. 5,578,045;
which is a divisional application of US Patent Application No. 08/062,095, filed 14 May
10 1993, now US Patent No. 5,334,217; which is a divisional application of US Patent
Application No. 07/822,951, filed 21 January 1992, now abandoned.--

Submitted herewith are nine sheets of formal drawings to replace the "informal"
Figures 1-16.

IN THE CLAIMS:

15 Without prejudice, please cancel claims 1-30, i.e., all of the claims in the
application as filed.

Please add the following as new claims 31 - 36:

31. (New) A septal defect closure device comprising a first member and a second member each comprising a self-expanding structure exhibiting a spring-like behavioral component for moving the member between a compressed orientation for passage through a medical instrument having an inner diameter and an expanded orientation having an enlarged diameter for tautly holding at least a portion of the closure device against a septum, the enlarged diameter of the member being greater than the inner diameter of the medical instrument; each of the first and second members also including a central portion, at least a substantial portion of the central portion of the first member being in communication with at least a substantial portion of the central portion of the first member.
32. (New) The device of claim 31, wherein the portions of the disks in communication with one another are attached to one another to define a conjoint disk.
33. (New) The device of claim 32, wherein a maximum dimension of at least one of the first and second members is between about 1.6 and about 2.5 times a diameter of the conjoint disk.
34. (New) The device of claim 31, wherein the first member in its compressed orientation extends primarily distally from the second member and the second member in its compressed orientation extends primarily proximally from the first member, each member in its expanded orientation extending primarily radially outward from its central portion.
35. (New) The device of claim 31, wherein each of the first and second members comprises a flexible fabric disk.

36. (New) The device of claim 31 wherein said at least a substantial portion of the central portion of said first and second members includes said central portions of said first and second disk members, respectively.

REMARKS

5 The present Preliminary Amendment accompanies a new patent application being filed under 37 CFR 1.53(b) as a divisional application of Application No. 08/756,776, filed 26 November 1996. Upon entry of the present amendment, there will be a total of 6 claims, of which only 1 is independent. Accordingly, no excess claims fees are believed to be necessary. In the event that any such fees are deemed
10 necessary, they may be charged to Deposit Account No. 061910.

Applicant paid the issue fee for Application No. 08/756,776 22 December 1998, but has not yet received notice of the patent number assigned to that case. After the patent number assigned to the parent application is known, applicant will amend the first paragraph of the present specification to reflect that patent number.

Respectfully submitted,

Dated: 11 March 99
